*“Having worked in almost every capacity in the art of record making (Engineer, Artist, Producer), it’s my view that we must come to terms with the fact that budgets are tight, profit margins slim, and we’re not living in the same world as we were a decade or two ago. My rates represent my commitment to bring the best of my abilities, gear, and resources to your projects, while avoiding cost and time-cutting measures often employed for the sake of increasing volume output. Music is a calling for me, and it’s my goal that the services we provide help, encourage, and inspire others to pursue their musical dreams as well.”*

-Cass Anawaty, Owner and Chief Engineer
